Dear Hiring Manager,

I am writing to express my interest in the [Position Title] at [Company Name]. As a highly motivated and results-oriented developer with a strong background in full-stack development, I believe my skills in both frontend and backend technologies, along with my passion for creating intuitive web applications, make me a perfect candidate for the role.

I have recently graduated with a BSc in Computer Science Engineering from North South University and have hands-on experience working with various technologies, including JavaScript, React.js, Node.js, Express.js, MongoDB, and Redux Toolkit. During my time at Sparktech Agency as a MERN Developer and at Bitasoft as a Web Developer, I gained practical experience in designing and developing e-commerce platforms, tenant service request systems, and more.

One of the projects I'm particularly proud of is RentalVate, a tenant service request platform I built using Next.js and Redux Toolkit. I implemented dynamic routing and used Redux to manage state effectively, ensuring a smooth user experience for tenants. Additionally, I have developed an e-commerce platform, Lebaba, for women's accessories, where I integrated NextAuth for secure user authentication and used Redux for state management. These projects reflect my ability to develop both client-facing applications and server-side functionalities.

I am confident that my background and technical abilities, combined with my enthusiasm for continuous learning and development, would enable me to make a positive contribution to your team. I am eager to bring my skills in web development and help build innovative, high-quality solutions.

Please find my resume attached for your review. I look forward to the opportunity to discuss how my skills and experiences align with your company's needs. Thank you for your time and consideration.
